9. Next, move your way over to the Husky. Look at the back of the plane. What special function does this plane have that the Beaver does not?

Jump back towards the Fairchild KR-34. There is a pilot standing next to the plane. This pilot is dressed very warmly for flight in the open cockpit of this plane. Name 3 things he is wearing to keep himself warm.

13. Skip over to the wreckage of CF-AYO. This Norseman airplane was in a movie called "Captain of the Clouds" with a famous actor. His name was _____.

15. There's one plane left - the odd-looking Seabee. Think back to the huge CL-215. These two planes have something in common - what is it?

14. Air Engineers played a very important role in aviation; they were the partners of the pilots and were the ones who designed and maintained the aircraft. Jim Chatham Leggat was one of them. What is one of his life philosophies?

12. Go visit Jim's Radio Room. Try and spell your name using Morse Code. Then, using the key posted there, solve this message!

10. Now, we all know this is a Bushplane Museum, but we also have a special collection of railcars! Find the railcars; why were these so important to Lands & Forests fire detection crews?

11. Climb to the top of the Fire Tower. Press the buttons to activate the 3 fires inside the Museum. Using the alidade, what are the coordinates for each one?
